# The typogrid package

Harald Harders (`h.harders@tu-bs.de`),  
Rolf Niepraschk (`rolf.niepraschk@ptb.de`)

File Version v0.21, 2011/12/31, printed December 31, 2011

**Abstract**

This package produces a typographic grid on every page of the document. That grid consists of vertical lines that devide the text block into columns. This may be useful to get the horizontal measures (distances etc.) into good values.

**Contents**

<b>1 Usage</b>	1
<b>2 Shortcomings</b>	2
<b>3 The implementation</b>	2

**Copyright**

Copyright 2003, 2011 Harald Harders, Rolf Niepraschk.  
This program can be redistributed and/or modified under the terms of the  
LaTeX Project Public License Distributed from CTAN archives in directory  
macros/latex/base/lppl.txt; either version 1 of the License, or any later version.

**1 Usage**

Load the package using the

```
\usepackage[options]{typogrid}
```

command. Valid options are `final`, `draft`, `columns=<value>`, `headings=<true,false>`, and `margin=<true,false>`. The options `final` and `draft` may be given explicitly or implicitly from the document-class options.

When `draft` is given the typographic grid is switched on; if `final` or none of the above is given it is switched off.

The `columns` option determines the number of columns printed. If it is not given, a default of 12 is used.

If `headings=true` is given, a grid is printed for the head line and the foot line, too (this is the default, you may also omit it). If `headings=false` is given, no grid is printed for the headings.

--	--	--	--

--	--	--	--

<pre>\typogridsetup</pre> <pre>\typogrid</pre>	<p>With <code>margin=false</code>, you can switch off printing a frame around the area for margin notes (default is to print the frame).</p> <p>There is a second possibility to change the typographic grid. You may use the <code>\typogridsetup</code> command that takes a keyval list as argument. The same keywords are allowed as in the <code>\usepackage</code> line, e.g.,</p> <pre>\typogridsetup{columns=4}</pre> <p>You may use this command within the text in order to change the grid at arbitrary position of the document. The change takes effect on the next page.</p> <p>If you have switched off printing of the grid, you may get a grid for single pages using</p> <pre>\AddToShipoutPicture*{\typogrid}</pre> <p>The package defines the length <code>\gridwidth</code> which is as long as the space between two grid lines. You may use it to scale pictures to fit to the grid, for instance.</p> <h2>2 Shortcomings</h2> <ul style="list-style-type: none"> <li>• Calculation of position and size of the headings and the margin works for standard cases only.</li> <li>• If the text width changes from one page to the next, the grid width is wrong on the first page after the change.</li> </ul> <h2>3 The implementation</h2> <p>Heading of the package:</p> <pre>1 \ProvidesPackage{typogrid} 2 [2011/12/31 v0.21 Typographic grid] 3 \RequirePackage{calc} 4 \RequirePackage{keyval}</pre> <p>Introduce the used lengths.</p> <pre>5 \newlength{\gridwidth}%</pre> <p>Introduce the used counters and set the default number of columns.</p> <pre>6 \newcount\tpg@blocks% 7 \newcounter{tpg@blocks@new}% 8 \setcounter{tpg@blocks@new}{12}%</pre> <p>Declare a command that can be used to change the appearance of the typographic grid. The argument takes a list of keyval options.</p> <pre>9 \newcommand*\typogridsetup[1]{% 10   \expandafter\setkeys\expandafter{\typogrid}{#1}}</pre> <p>Define the key <code>columns</code> that takes the number of columns.</p> <pre>11 \define@key{typogrid}{columns}{% 12   \setcounter{tpg@blocks@new}{#1}% 13   \ifnum\the\c@tpg@blocks@new&lt;1\relax 14     \PackageError{typogrid}{Less than 1 column given}{You have to</pre>

```

97     \global\tpg@margintrue
98 \else
99     \global\tpg@marginfalse
100 \fi
101 }

Start the grid at \begin{document}. Do it that late to enable the author to switch
between draft and final before that position.

102 \AtBeginDocument{%
Print the grid on any page if wanted.

103 \iftpg@draft
104     \typeout{Typographic grid switched on}%
105     \AddToShipoutPicture{\typogrid}%
106 \else
107     \typeout{Typographic grid switched off}%
108 \fi

Declare width of grid for first page of document.

109 \setlength\gridwidth{\textwidth/\arabic{tpg@blocks@new}}%
110 \global\tpg@blocks=\arabic{tpg@blocks@new}%
111 \iftpg@headings@new
112     \tpg@headingstrue
113 \else
114     \tpg@headingsfalse
115 \fi
116 \iftpg@margin@new
117     \tpg@margintrue
118 \else
119     \tpg@marginfalse
120 \fi
121 }

```
